Zhang Shufeng(Keith)

Phone：+852 84969517 **Personal Website: https://Keith-hot.github.io/**
Email：shufengzhang@ln.hk **GitHub：** https://github.com/Keith-hot

EDUCATION

Lingnan University of Hong Kong **Hong Kong,China**
Master of Science in Data Science *2025.09-2026.06*

- Core Courses: **Database Management**, **Data Mining**, **Machine Learning**, **Data Visualization**, Big Data Technology, Deep learning.

Nanfang College Guangzhou **Guangzhou,China**
Bachelor of Data Science and Big Data Technology *2021.09-2025.06*

- **GPA : 83.22 (Top 20%)**
- **Honors:** Third Prize **Scholarship** of Nanfang College Guangzhou (NCU), Guangzhou

WORK EXPERIENCE

Guangdong Yifucheng Pharmaceutical Co., Ltd. **Jiangmen,Guangdong,China**
Financial Assistant, Finance Department *2024.10 - 2024.12*

- Processed accounts payable and employee expense reimbursements.
- Organized and maintained financial documents and vouchers.
- Assisted in data entry and supported month-end reporting.

Company: Chinalin Securities **Jiangmen,Guangdong,China**
Position: Assistant Wealth Manager *2024.08-2024.10*

- Researched market dynamics to offer personalized investment recommendations and supported senior advisors in designing asset allocation plans.
- Analyzed client needs and tailored wealth strategies, developing customized risk management and wealth appreciation solutions.

Guangzhou Yueqian Communication Technology Company, LTD **Guangzhou,Guangdong,China**
Internship of Software Designing Department *2024.07-2024.08*

- Designed and built a real-time stock data query system using Java to support data monitoring and analysis.
- Optimized data management with Java Collections and implemented multithreading for seamless updates and improved system responsiveness.
- Applied Spring framework for dependency injection and transaction management to enhance code modularity and ensure data consistency.

PROJECT EXPERIENCE

Q-Learning Space Shooter: A Reinforcement Learning Approach *2026.03-2026.04*

- Built a space shooter game with Pygame featuring complex mechanics and a 20-dimensional state space.
- Implemented DQN with PyTorch, using experience replay and a tuned reward function to train the agent.
- Achieved a top score of 10,070, demonstrating human-like tactics and validating RL for complex game AI.

Adversarial Training Defense - MNIST Adversarial ML *2026.03-2026.04*

- A complete PyTorch implementation of adversarial machine learning, covering FGSM and PGD attack methods, plus adversarial training defense strategy based on Madry et al. (2017).
- Validated adversarial sample generation and defense mechanisms on MNIST dataset, improving model robustness under adversarial conditions.

Smart Respondent Recruitment System — 3.9× Conversion Lift *2026.03-2026.04*

A smart respondent recruitment automation system based on the RONIN platform, achieving comprehensive automation of recruitment workflows through data-driven strategies and automated messaging. The system delivered a 3.9x conversion lift, dramatically improving respondent acquisition efficiency for research projects.

- *Designed and implemented automated recruitment funnel covering application to participation*
- *Optimized message templates through A/B testing to achieve 3.9x conversion lift*

SKILLS & INTERESTS

- ***LANGUAGES***: Native in Mandarin and Cantonese; Fluent in English
- ***PROGRAMMING & DATABASES***: **Python** (Proficient), **SQL** (Proficient), **R** (Familiar), **JAVA**; **MySQL**, **NoSQL**
- ***ML***: PyTorch, Scikit-learn, LightGBM, Statistical Modeling, Data Mining, NLP, Recommender Systems, Q-Learning
- ***GENERATIVE AI & LLM***: **RAG Pipeline**(LangChain/LlamaIndex), Vector Retrieval, Prompt Engineering, Document Chunking & Embedding
- ***COMPUTER VISION***: *YOLOv8, OpenCV, Image Classification, Object Detection*
- ***DATA VISUALIZATION & TOOLS***: *Tableau, Power BI, SAS Viya, Git, MATLAB, SPSS*
- ***INTERESTS***: *LLM applications in finance; end-to-end ML system design; game AI & reinforcement learning*
